

Re: Vividata Fall 2018 Study Release: Guidelines for Data Use and Reporting

Dear Member:

On Wednesday, October 17th, 2018 the **Vividata Fall 2018 Study** will be released @ 9:00am (EDT) to all members in good standing. Since the Summer release, Vividata results will be based on Canadian respondents aged 14+, as respondents aged 12-13 require parental consent.

This release is based on fieldwork from July 2017 through to June 2018. The total sample size is 43,014 Canadians 14+. The Fall 2018 release is a single source database containing cross-platform readership metrics for magazines and newspapers, as well as a comprehensive database of consumer behavior, media usage and product/brand usage data. Print and digital readership and product data is being released in a single database for all 64 daily newspapers, 9 community newspapers, 63 magazines and 3 other publications.

We are taking this opportunity to re-state the Guidelines included in your Membership Agreement and to provide guidelines specific to the upcoming Fall 2018 release.

As a member, we remind you of your obligation to comply with the Board's determination as set out in your Vividata membership agreement. Any violations of the membership agreement (including the guidelines) will be referred to the Board which will determine appropriate action in its sole discretion.

Release Date: Embargo on publication of results until 9:00am (EDT) on October 17, 2018

No results are to be shared or published in the public domain before 9:00 am (EDT) on October 17, 2018. This applies to all members, including publisher members who may have early access to the data.

The general guidelines and those specific to Fall 2018 will also be posted on the Public and Member's Area of the Vividata website.

Guidelines

Vividata 2018 Fall Study readership results are industry currency.

- **Users** means all Vividata Members & Affiliates in good standing, and other parties to whom the board has granted access to the Study.
- **Public domain** means any use which is not confined to Users and their Representatives and includes advertising, promotional material and sales kits in any form.
- The Vividata database may be used in the public domain only by Users.
- When reporting the Vividata database in the public domain, Users must exercise their best efforts to avoid bringing the database and Vividata into disrepute.
- Users should use the Vividata database only in such a manner that will not depreciate the value of, or lead to a loss of confidence in, the Vividata database to other Users.

Vividata Fall 2018 Usage Guidelines Specific to Newspapers and Magazines:

In January 2016, the readership questionnaire was based on a new structure with major changes from 2015 in the wording for the readership screen-in questions for newspapers and magazines and significant changes in the digital content readership questions. As a result, caution should be exercised in trending print metrics prior to 2016 Q4 and digital metrics can only be compared back to 2016 Q4.

Vividata Fall 2018 Data Usage Guidelines for specific titles are in the Fall 2018 Study Appendix (pages 4 to 6).

General Usage and Reporting Guidelines for Vividata

- i) All data from the Vividata database quoted in the public domain must clearly state the relevant year and period of the Study or Studies as the source of the data. The study naming protocol should be observed (e.g. Vividata Fall 2018.). Ensure that any data presented and reported in the public domain is accurate and the source clearly identified.
- ii) The data reference should be sufficiently clear that other members are able to replicate the data, and should provide a clear definition of the metrics used to avoid confusion and provide context for the reported data. (e.g. Adults 25-54 Mon-Fri AIR-Vividata Fall 2018)
- iii) A metric that is currently available in Vividata should not be substituted with an estimate (e.g. Weekly Cume readership).
- iv) Users who develop simulations, projections, models or prototypes incorporating data from the Vividata database for use outside their immediate company must obtain advance written approval for these actions from the Board. Any data from the Vividata Study or database used for such purposes cannot be sourced as data from Vividata and must identify in a manner approved from the Board that such usage is an estimate.
- v) When Vividata results are presented in conjunction with data from other sources, the information should clearly distinguish the different data sources.
- vi) Data from Vividata on a measured publication may not be claimed, presented or used in any way as findings for any other publication, including, but not limited to, affiliated non-measured publications distributed to part, or all, of the same distribution base.
- vii) Users may not distribute data from the Vividata database in any form to media industry associations or government bodies without written consent from Vividata (e.g. CMDC Media Digest, News Media Canada, Magazines Canada, Canadian Heritage).

Provision of Data to Members and Non-members

Users may distribute data from the current study to non-members in order to conduct business with their clients or potential clients who are non-members within the terms and conditions of the Vividata membership agreement.

Users may not provide the Vividata database in its entirety, in any form, to a client, or potential client, whether or not such client or potential client is a member of Vividata in its own right.

Users shall not have any right to make available directly or indirectly any data from the Vividata database to another media vehicle or publication for use in the public domain, when such a media vehicle or publication is not a member of Vividata.

Where Vividata data is supplied by a member to a client:

- i) The findings must be confined to the specific media vehicle, medium, product or service for which the member and the client have existing or prospective business dealings.
- ii) It is the member's responsibility to ensure that Vividata access rules and confidentiality provisions are observed by the client.

The data in the Vividata database collected for the sole purpose of research controls (including, without limitation, name, address, e-mail address, telephone number, date, week or day of interview) shall not be made available to Users for use in analysis.

Unauthorized Use/Complaints

Any unauthorized use, publication, and distribution of the information except as provided under the Agreement is strictly forbidden and may give rise to legal proceedings.

Users will notify Vividata immediately upon discovery of any unauthorized or unlawful disclosure, divulgence, communication or use of any of the information.

All complaints should be submitted in writing to Vividata and must be supported by documented evidence.

Data usage issues which are raised by Users may be referred to the Board. The Board, in the Board's sole discretion, will determine appropriate action.

For those members without software access, please contact your Vividata representative: Tosha Kirk at tosha@vividata.ca or Isabelle Michaud at isabelle@vividata.ca.

If you have any questions, or require clarification on any of these points, please contact Pat A. Pellegrini, CEO & President, at 416 961 3205 or pat@vividata.ca

APPENDIX I: Readership/Audience Metrics in Fall 2018 Study

The readership metrics available in Vividata Fall 2018 Study Database are summarized below:

Newspapers	Magazines
<p><u>Major and Local Markets</u></p> <ol style="list-style-type: none"> 1. Print Weekday AIR 2. Print Sat AIR 3. Print Sun AIR 4. Print/Digital Summary <ol style="list-style-type: none"> a. Print/Digital Weekday AR b. Print/Digital Saturday AR c. Print/Digital Sunday AR 5. Weekly Cume <ol style="list-style-type: none"> a. Print 5 Day Cume b. Print 6-Day Cume c. Print 7-Day Cume d. Digital Weekly Cume e. Total Print/Digital Weekly Cume 6. Digital Content Readership (Last Time Access) <ol style="list-style-type: none"> a. Yesterday b. Past Week c. Past Month 7. Frequency of Access Digital Content <ol style="list-style-type: none"> a. Once a Day b. A Few Times a Week c. Once a Week d. A Few Times a Month e. Once a Month f. Less Often 8. Digital Content Readership (By Day) <ol style="list-style-type: none"> a. Mon-Friday b. Saturday c. Sunday 	<ol style="list-style-type: none"> 1. Print AIR 2. Digital Content Readership (Last Time Access) <ol style="list-style-type: none"> a. Yesterday b. Past Week c. Past Month d. Past 2 months e. Past 3 months 3. Frequency of Access Digital Content <ol style="list-style-type: none"> a. Once a Day b. A Few Times a Week c. Once a Week d. A Few Times a Month e. Once a Month f. Less Often 4. Total Print/Digital AR
<p><u>Community Papers</u></p> <ol style="list-style-type: none"> 1. Print AIR 2. Digital Content Readership (Last Time Access) <ol style="list-style-type: none"> a. Yesterday b. Past Week c. Past Month 3. Total Print/Digital AR 	

APPENDIX II: Publication Guidelines Specific to Fall 2018 Study

Users should be aware of the following when using Fall 2018 data.

1. MAGAZINES

The following publications had **changes in frequency of publishing/logo**. When comparing data to previous studies, please exercise caution.

FPM: Financial Post Magazine changed logo and title (to FPM) in October 2016. Measurement of old & new logos continued from 2016 Q4 to 2017 Q4. January 2017 frequency change from 9 issues to 6 issues impacting the qualifying interval used to calculate AIR.

Les Affaires: Measurement of two titles/logos (Les Affaires and Les Affaires Plus) and report as one “net” readership number. Change in publishing frequency in January 2017 from 43 issues to 28 issues has impacted the qualifying interval used to calculate AIR.

L’Actualité: Change in publishing frequency from 18 in 2017 Q1 to 15 in 2017 Q2 to 12 in 2018 Q1 which has affected the qualifying interval used to calculate AIR.

Live Better: Changed frequency in Q3 2017 wave to 4 from 8. Impacts AIR qualifying interval.

Vivre mieux: Changed frequency in Q3 2017 wave to 4 from 6. Impacts AIR qualifying interval.

Best Health: Changed frequency in Q3 2017 wave to 6 from 7. Impacts AIR qualifying interval.

Today’s Bride: Ceased measurement as of April 2018. Readership data available via numeric coding.

Other Changes:

Rogers Digital Titles (Canadian Business, Flare and MoneySense): As of January 2018 measured as Websites/Apps. Past month Digital Content AR from previous quarters were matched to be released under “Websites/Apps”.

Good Times: Both Print and Digital Readership reported in the Fall 2018 Study. In previous studies digital readership was not available.

Business in Vancouver: As of 2017 Q3 Vividata Study listed under “Other Publications” (not as a magazine).

ParentsCanada: Publication ceased publishing print issues as of February 2018. Print and Summary Readership will not be reported.

2. NEWSPAPERS:

Newspaper digital frequency: In 2017 Q3 digital content qualitative data was filtered on **past week recency**, in Spring and Summer 2018 this was filtered on **past month recency** and so should not be compared to 2017 Q3 and earlier.

StarMetro Titles: Measured as of 2018 Q2 wave. Print data combined with previous Metro readership. Digital readership combined with Toronto Star Digital numbers and not reported on it's own

Toronto Star: Print readership excludes Calgary, Edmonton and Vancouver readership

La Tribune: As of July 2017 measured across extended area. Readership to be compared to previous studies only when filtered by home market

Le Nouvelliste: As of July 2017 measured across extended area. Readership to be compared to previous studies only when filtered by home market

The Chronicle Herald: As of July 2017 measured across Nova Scotia Province. Readership to be compared to previous studies only when filtered by home market

Le Soleil: Sunday editions ceased publishing as of April 2017. No Sunday readership numbers will be reported

3. OTHER PUBLICATIONS:

Toronto Star Wheels: Print readership excludes Calgary, Edmonton and Vancouver data.
